

City of Sedalia
2025-008 Plug Water Well #7
Addendum #1
November 20, 2024

1. Who is responsible for hauling off the old pumping equipment and concrete pedestal? Flynn Drilling Co. can include this in cost, but wanted to verify. *All materials to be left on site.*
2. Is the City going to provide an operator and backhoe to dig up at the well for Flynn Drilling Co. to cut off casing and remove concrete pedestal 3' below grade? *The city will provide the equipment and 1 operator if needed to excavate around the well. The Contractor will be responsible for cutting off the casing. The City operator will remove the concrete pedestal.*
3. There was not a bid sheet in your packet, so I assume you are wanting the price presented on our proposal letter head? *Yes, that would be acceptable.*
